Make your outdoor space even better.

## Screen Types

---

### Insect Screens

Maximum visibility and airflow.

### Clear Vinyl Weather Curtains

Maximum weather control with high visibility.

### Retractable Shades

Control harsh sunlight and heat.

### Hurricane Screens

Miami-Dade NOA, Florida Product Approval, ICC 500

### Dual Screens Fabric

Hurricane, Insect, Clear Weather Curtain, or Shade.

### Dual Screens Aluminum

Integrated aluminum roll shutter + Insect.

## Options

---

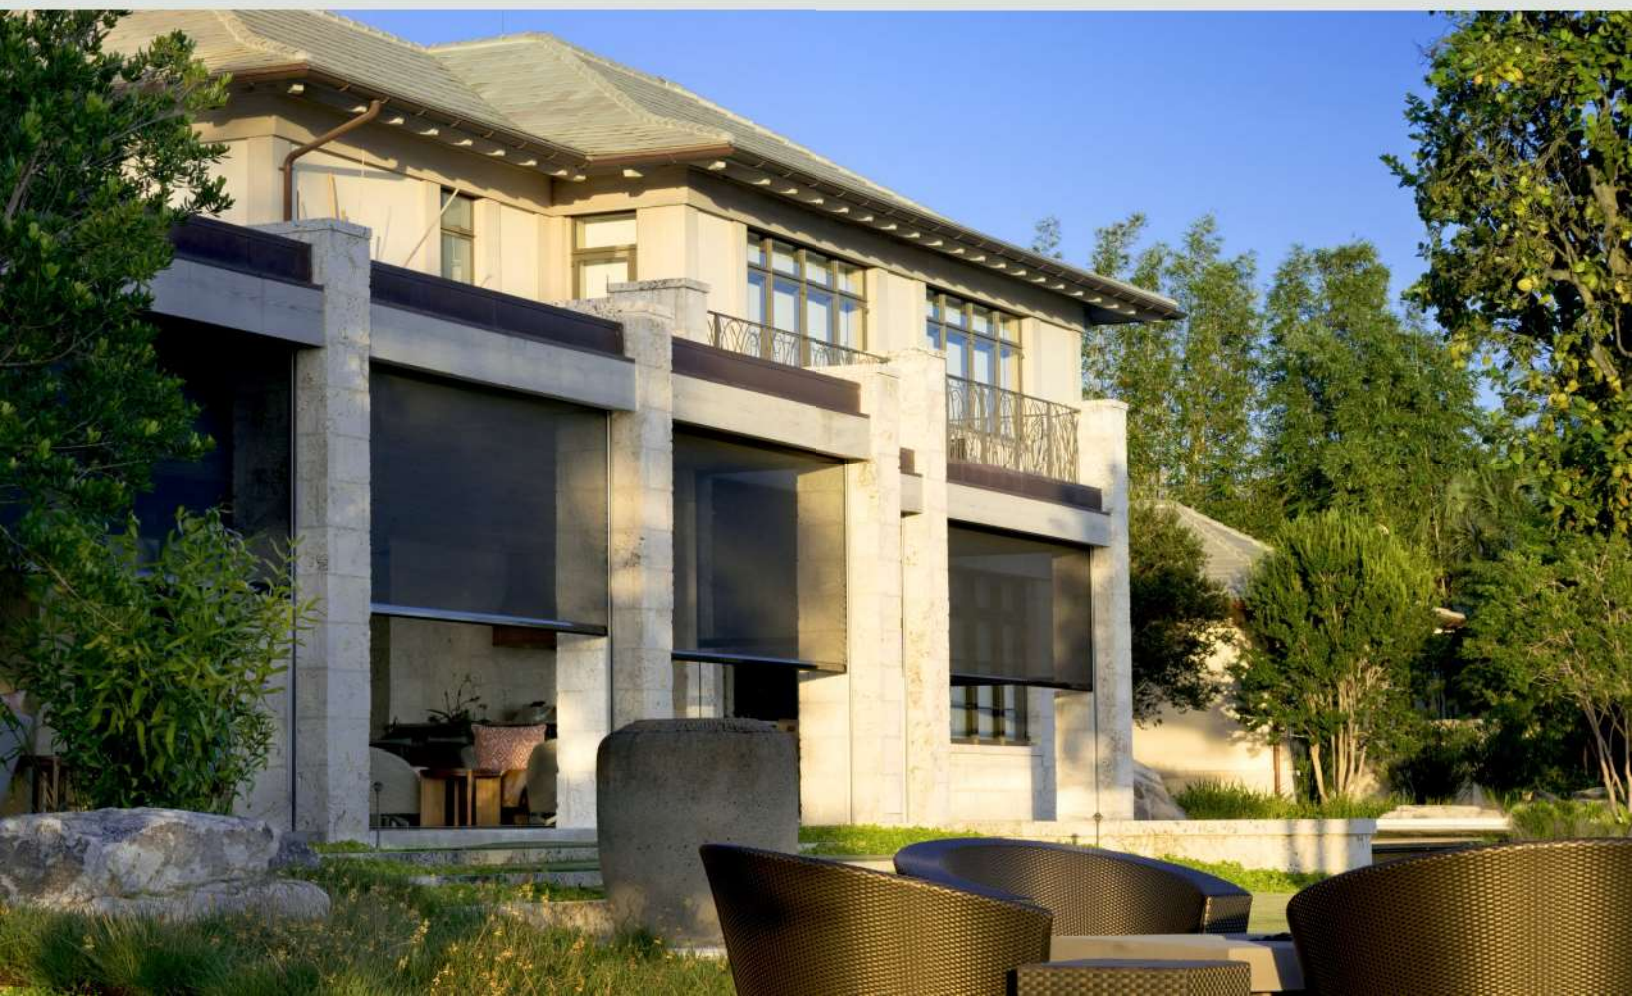

Typically projects are highly customized based on architectural features, site location, fabric choices, and customer requirements. Fenetex is uniquely capable of distilling a broad range of requirements into a finished screen system. It all starts with understanding the customer's needs. We look forward to hearing from you.

RETRACTABLE SCREENS

## The Fenetex Difference

---

### **Our screens do not use zippers**

All of our screens share the same type of end retention system we originally developed for our 200mph wind and impact-rated hurricane screens. Zipper based screens are notorious for blowing out; we solved the problem.

### **Our tracks are adjustable**

We all want a screen that is as wrinkle-free as possible and operates smoothly. To balance these two goals, we designed a track that moves. With a screwdriver and a few minutes, our screens are easily adjusted to compensate for the many variables that would normally cause wrinkles and sticking screens. The adjustable track solves these issues.

### **Our screens are designed for longevity**

We see value as a long term proposition. Using the best materials and equipment, we build screens that last. Some would say our screens are overbuilt and we're perfectly fine with that.
